State of Maryland Sign Language & Interpreting Services Directory

This directory is a catalog of interpreters located in the state of Maryland. The interpreters provide services for all government and non-governmental agencies. However, using an interpreter near your service area is advisable and economical. Free/volunteer interpreters are always encouraged because of the costs associated with such services.

All facility offices may solicit the assistance of volunteers in public schools, community colleges, universities, churches, community outreach programs, local governmental and non-governmental social service agencies. Your facility office is responsible for all charges/fees as the costs associated with these interpreting services would need to be covered by your local state or facility budget.

Page 1-4 include the names, phone numbers and addresses of these providers. Not all service addresses are listed by the providers, but your county office is encouraged to negotiate all charges and the charges must be approved by your facility Manager or Director prior to entering an agreement with any interpreting service provider.
