

UMD MAES REC Animal Use Request Form

This request must be completed by any PI planning to use animal subjects for research purposes. This form can be completed before or during the IACUC approval process, but **research projects cannot begin without completion of this form and an approved IACUC protocol.** It is the responsibility of the PI to provide the Facility Manager with a final, approved IACUC protocol to be kept on file with this form.

Which AGNR Strategic Initiative best describes this study?

PI:	Department:
-----	-------------

Email:	Facility:
--------	-----------

Study Title:

Briefly describe intended study:

Duration:	Start Date:
-----------	-------------

Species:	Number of animals:
----------	--------------------

Select Yes or No to the following questions using the space below to elaborate on an questions with a Yes response.

Does the research involve treatment that will require extra costs?

Does the research alter the production level or sale value of animal or offspring?

Will the research be terminal for the animal?

Will the research result in permanent alteration because of surgery, diet, or other treatment?

Will the research affect growth and development?

Will the research affect breeding age or data?

Will the research require movement of animals from the facility?

<i>Provide additional details to the above questions:</i>

What services, other than availability of animals, will be requested of animal caretakers?

What are you requesting the Center facility to supply? (i.e. items and care beyond regular care of animal)

What items will PI supply for the research?

Does the PI have the ability to provide financial support to the center from grants or other available funds?

Does the study align with additional Strategic Initiatives? Select all that apply.

Establish a healthy food system and ensure global food security

Ensure a clean and healthy Chesapeake Bay

Advance innovative, profitable, and sustainable agricultural production systems

Improve human, animal, and environmental health

Optimize urban environments through design, green technology, and community engagement
